This class will provide students with a full understanding of the world of cultural resource management. Students will learn the pertinent laws, agencies, and procedures of CRM (Cultural Resource Management).

What are cultural resources?
What does it mean to manage them?
Why do we need to?
Is it just archaeology?

Students will gain real world experience through occasional exercises, including issues regarding finding, conducting, and completing projects among other things (such as how to find a job).

Information literacy is also expected of students, meaning that you will need to know how to use the library and online data sources to conduct research.

In the end, students will have a strong understanding of what it takes to be a cultural resource manager and will have enough information to determine if this is a potential career option.

LEARN TO PROTECT OUR HERITAGE.
